ABOUT US

COVFA is a visualization tool made for professional and personal use.

The purpose of this app is to allow the users to better understand the factors contributing to COVID-19.

This enables us to use this application for research purposes as analyzing the data will be easier in a form of visualization.

OUR GOAL

Our goal is to raise awareness of the factors leading to the transmission of Coronavirus, aiding health authorities to make better decisions.

OUR MISSION

Enabling collected data about factors leading to Coronavirus spread to be public.

OUR VISSION

To aid Malaysia's health authorities to end COVID-19
